TITLE Enrollment in Florida's Institutions of Higher Learning Fall 1971.  
INSTITUTION Florida Board of Regents, Tallahassee.  
PUB DATE Aug 72  
NOTE 99p.  
EDRS PRICE MF-\$0.65 HC-\$3.29  
DESCRIPTORS Educational Demand; Educational Supply; Enrollment; \*Enrollment Rate; \*Enrollment Trends; \*Higher Education; \*School Registration; Statistical Data; \*Student Enrollment

ABSTRACT

This document presents the enrollment figures for the institutions of higher education in Florida in the fall of 1971. The data are arranged in several categories: (1) statewide enrollment; (2) enrollment by institutions; (3) first time in college enrollment; (4) graduate student enrollment; and (4) trends and new developments in Florida higher education. The report reflects several trends of educational significance: the rapid growth of enrollment in the community colleges; the leveling off of lower division enrollment in the public universities; the increase in upper division enrollment in the State University System; and the steady, paced, collective enrollment gains of the institutions in the private sector.

## PREFACE

This volume of Enrollment in Florida's Institutions of Higher Learning is the fourteenth issue of a series of enrollment publications dating back to 1958.

The number of institutions of higher learning has nearly tripled since the statewide enrollment report was first prepared. Enrollment has increased from approximately 50,000 students in the fall of 1957 to more than 243,000 in 1971. The enrollment report series reflect several trends of educational significance: the rapid growth of enrollment in the community colleges; the leveling off of lower division enrollment in the public universities; the spectacular increase in upper division enrollment in the State University System; and the steady, paced, collective enrollment gains of the institutions in the private sector.

We are grateful to the many educators in the colleges and universities of Florida, too numerous to cite individually, who have provided the Office of the Chancellor, State University System, with enrollment data, not only for this volume, but for preceding volumes. Presidents, deans of students, registrars and admissions officers, directors of institutional research and directors of data systems have joined efforts to supply us with reports of student enrollment. Without the assistance of these contributors, this series of enrollment reports would not be possible.

There are three persons whose efforts in assembling enrollment data for publication merit especial reference: Thomas Baker, Division of Community Colleges, for coordinating enrollment data from the community colleges; Bradford Cowles, for preparing the statistical tables and for drafting the accompanying narrative; and G. Emerson Tully, for giving overall direction to the preparation of this volume. The latter two persons are members of the Board staff.

Allan Tucker  
Vice Chancellor for Academic Affairs

August, 1972

**CHAPTER I**

**GENERAL INFORMATION**

## CHAPTER I

### GENERAL INFORMATION

Enrollment in Florida's Institutions of Higher Learning presents the fall, 1971 enrollment data, ratios and comparisons with prior years. The data are presented for the public sector and the private sector. The public sector includes the public universities and the public community and junior colleges. The private sector includes the private baccalaureate degree-granting institutions (four-year undergraduate and graduate degree) and the private junior colleges. A listing of the individual colleges and universities included in each sector follows in this chapter.

Chapter I also includes a list of abbreviations used to designate types of institutions and enrollment terms. A map of Florida shows the locations of the public and private degree-granting institutions. A second map shows the locations of all public and private community and junior colleges in Florida.

Chapter II is a report of Statewide Enrollment in the fall term, 1971. Detailed information is provided for the defined sectors of Florida higher education in Chapters III, IV, and V. Chapter III provides enrollment by institutions. Chapter IV presents first-time-in-college enrollment. Graduate enrollment is detailed in Chapter V. Chapter VI contains a summary of the enrollment data and an analysis of how these data relate to existing trends and emerging developments.

**CHAPTER II**

**REPORT OF STATEWIDE ENROLLMENT**

CHAPTER II  
REPORT OF STATEWIDE ENROLLMENT

On-campus enrollment in Florida's institutions of higher learning is presented in the fourteen tables which comprise this chapter. Off-campus enrollment data are not reported in this publication.

Total on-campus headcount enrollment in higher education in the fall, 1971, for the State of Florida was 243,746. This was a 7.5 per cent increase over the fall of 1970. Enrollment in the public sectors continued to grow, showing a 9.5 increase over the fall of 1970. The private sector, however, experienced a net decrease of 0.3 per cent in enrollment from fall, 1970 to fall, 1971. The annual percentage changes in total on-campus enrollment for the past seven years have been the following:

	Combined Sectors	Public Sector	Private Sector
Fall, 1971 over Fall, 1970	7.5	9.5	-0.3
Fall, 1970 over Fall, 1969	7.1	8.4	2.1
Fall, 1969 over Fall, 1968	9.7	11.4	3.6
Fall, 1968 over Fall, 1967	12.2	13.2	9.2
Fall, 1967 over Fall, 1966	10.3	13.2	7.0
Fall, 1966 over Fall, 1965	13.5	14.6	3.4
Fall, 1965 over Fall, 1964	17.5	21.1	9.3

Table 1 shows by types of institutions the numbers of graduate and undergraduate students which make up the total Florida headcount enrollment of 243,746. In Table 2 undergraduate on-campus enrollment is presented by type of program.

On-Campus enrollment of Florida residents represents 85.5 per cent of total enrollment (Table 3). On-campus enrollment by undergraduate and graduate level --Florida and non-Florida--is shown in Table 4. The private sector enrolled

56.6 per cent of the 35,259 non-Florida students (Table 5). The origin of total on-campus enrollment by state or other geographical area and type of institution is shown in Table 6, while Table 7 presents the same information by counties for Florida students.

Table 8 through 12 present an historical account of enrollment figures and percentages of Florida and non-Florida students by types of institutions. Beginning in 1958 when the first in the series of statewide enrollment publications was printed, the percentage of on-campus enrollment in private institutions (Florida and non-Florida combined) has steadily decreased from 46.0 per cent to 18.5 per cent of the total. This change of over 27 per cent in 14 years shows an average annual decrease of nearly 2 per cent (Table 8).

The significant increases in the 1969 and 1970 on-campus male enrollments in the private junior colleges were balanced in 1971 by a 6.3 per cent decrease (Table 13). The private sector as a whole, however, continues to show a slightly higher percentage of male on-campus students than the public sector. Male-female ratios for each of the public universities, for the public junior and community colleges as a group, private four-year institutions as a group, and private junior colleges as a group are shown in Table 14.

**CHAPTER III**

**ENROLLMENT BY INSTITUTIONS**

## CHAPTER III

### ENROLLMENT BY INSTITUTIONS

All institutions included in this study award degrees--associate or higher. The public institutions numbered thirty-four--seven universities and 27 public two-year institutions. In the private sector there were 21 baccalaureate degree-granting institutions and five junior colleges.

Table 15 ranks institutions enrolling more than 2,500 on-campus students in order of their enrollment size. Miami-Dade Junior College, with an enrollment of 30,853 students, has led Florida institutions in enrollment numbers since 1967. The list contains these additions to the list published in the fall of 1969: Daytona Beach Community College, Tallahassee Community College, and Manatee Junior College. All of the other institutions appeared on the 1970 list, although more than two-thirds of the institutions changed in rank order. Table 16 is a grouping by enrollment size of all of Florida's institutions of higher learning.

Figures in Table 17 show the male and female components of on-campus enrollment, first-time students, and terminal students. This is followed by summary figures for each type of institution (Table 18), and enrollment by institution, type of enrollment, and sex (Table 19). First-time-in-college enrollment includes all new freshman-level students who have not previously enrolled in any institutions of higher learning. Terminal enrollment denotes a college-grade enrollment in a terminal or technical program consisting of curriculums of at least one year but fewer than four years.

On-campus enrollment for Florida and non-Florida students, with the percentage of non-Florida students per institution, is presented in Table 20.

Florida State University led public institutions with 17.19 per cent non-Florida enrollment. New College with 88.12 per cent out-of-state enrollment led institutions in the private sectors. Total on-campus enrollment is detailed in Table 21 for alternate years 1961 through 1971.

The remaining tables in Chapter III refer to the State University System. Origin by state or other geographical area of enrollment for the seven state universities is presented in Table 22. Florida on-campus enrollment is shown in Table 23. Florida and non-Florida enrollment with percentages of total enrollment is presented for each year beginning with 1957 in Tables 24 and 25. Tables 26 and 27 give an historical account (1962-1971) of enrollments and percentages of on-campus enrollment for each of the seven institutions in the State University System.

**CHAPTER IV**

**FIRST-TIME-IN-COLLEGE ENROLLMENT**

## CHAPTER IV

### FIRST-TIME-IN-COLLEGE ENROLLMENT

First-time-in-college enrollment is a count of the students who enrolled initially in any college or university in the fall, 1971. A student was counted only once as a first-time-in-college enrollee. Subsequent enrollment by the student in any institution of higher learning does not constitute a first-time-in-college enrollment.

Table 28 shows a total of 57,303 first-time-in-college students of which 9,028 were in the State University System; 39,402 were in the public two-year college system; 8,129 were in private baccalaureate degree-granting institutions; and 744 were in private junior colleges. First-time-in-college students decreased 1.54 per cent from the fall of 1970 to the fall of 1971.

In the fall term, 1971, first-time-in-college Florida residents in the State University System numbered 8,263 which was 91.53 per cent of the total (Table 29). In the fall term, 1970, Florida residents in the State University System numbered 9,309 which was 91.14 per cent of the total.

The geographical origin of the 47,959 Florida students and type of institution in which they enrolled is set forth in Table 30. Table 31 shows the county origin of Florida resident students who enrolled in the various universities that make up the State University System.

The trend in first-time-in-college enrollment, beginning in 1957, in the public and private institutions expressed as a percentage of total first-time-in-college enrollment is reflected by Table 32. Table 33 shows similar information beginning in 1958 for Florida resident first-time-in-college students.

Information relating to non-Florida first-time-in-college students is set forth in Table 34.

Total first-time-in-college enrollment by state or other geographical area for the years 1964 through 1971 is shown in Table 35. Similar totals for Florida first-time-in-college enrollment are shown in Table 36, and Table 37 gives total first-time-in-college enrollment for all Florida institutions of higher learning for alternating years from 1961 through 1971.

**CHAPTER V**

**GRADUATE STUDENT ENROLLMENT**

## CHAPTER V

### GRADUATE STUDENT ENROLLMENT

A graduate student is a student who has enrolled on-campus in a college credit course after he has earned a baccalaureate or higher degree. On-campus graduate enrollment in the fall, 1971, was 19,775. The State University System accounted for 13,630 (68.9 percent) of these graduate students and private institutions accounted for 6,145 (31.1 per cent) of the state total (Table 38).

States with 150 or more graduate students enrolled in Florida institutions in the fall, 1971, were: New York, 322 students; Georgia, 190 students; and Pennsylvania, 163 students (Table 38). Graduate students from Florida totaled 15,462 or 78.2 per cent of total graduate enrollment (Table 39). Origin of graduate on-campus enrollment by state and other geographical area for the years 1964 through 1971 is shown in Table 40.

Graduate growth between 1969 and 1970 and between 1970 and 1971 dropped sharply as contrasted to graduate growth in previous years. In 1969, there was an increase of 3,422 over 1968. From 1969 to 1970, however, there was an increase of only 458 students, and from 1970 to 1971, there was an increase of only 380 students. The decreased growth was principally brought about by the curtailment of graduate enrollment in the state universities.

Table 41 is a listing by county of the graduate enrollment of Florida residents for the eight years 1964 through 1971. Graduate growth caused by Florida residents was 4.3 per cent in 1970-71 and 3.3 per cent in 1969-70. This was a large drop from the average annual increase of 41.3 per cent from 1963 through 1969.

Table 42 shows graduate on-campus enrollment by institutions. Included in the table is the percentage of graduate enrollment in the State University System. This percentage has grown from 63.1 per cent in 1964 to 68.9 per cent in 1971.

## **CHAPTER VI**

### **TRENDS AND NEW DEVELOPMENTS IN FLORIDA HIGHER EDUCATION**

## CHAPTER VI

### TRENDS AND NEW DEVELOPMENTS IN FLORIDA HIGHER EDUCATION

Enrollment in Florida's Institutions of Higher Education was first published in the fall, 1958. Twenty public and private institutions, with a total enrollment of 50,286 students, participated in that first study. In the last fourteen years, the number of institutions has grown to 60 (a 200 per cent increase), and the number of students has increased to 243,746 (a 385 per cent increase).

#### PUBLIC UNIVERSITY SYSTEM

The nine state-supported universities which comprise the State University System include four upper-divisional universities. Two of this four, Florida International University, Miami, and the University of North Florida, Jacksonville, will accept their opening classes of upper-division students in September, 1972.

The gain of 4,908 students in the fall, 1971, was the lowest gain in absolute number of students since 1966. The 6.7 per cent enrollment increase in the fall, 1971, is the lowest percentage increase since the fall, 1962 (Table 44).

The State University System accounted for 32.2 per cent of Florida's total on-campus enrollment in 1971, a slight decrease from the 32.4 per cent of 1970.

#### PUBLIC COMMUNITY/JUNIOR COLLEGES

In the fall, 1971, an enrollment of 120,149 students was reported in the state's 27 community and junior colleges. In 1957, the year the expansion began, seven public junior colleges reported a total on-campus enrollment of 5,444 students. The number of community colleges established is approaching the

number envisioned in 1957 when the Community College Council first reported its design for building public two-year colleges throughout Florida.

In the fall, 1971, Florida's junior colleges enrolled 49.3 per cent of the state's total headcount enrollment in higher learning. In the past decade, this sector has grown by an average of 9,803 students per year. The fall, 1971, report shows an increase of 12,315 students. The 1971 increase of 11.4 per cent over 1970 was 3.1 per cent more than the 1970 increase over 1969.

#### PRIVATE JUNIOR COLLEGES

For the 15 year period, 1957-1971, an on-campus enrollment increase of 46.1 per cent is shown for private junior colleges (Table 43). The large year to year fluctuations in the percentage changes in on-campus enrollment have been caused primarily by the changing of institutions from private degree granting to private junior colleges and vice versa. St Joseph College, Webber College, and Jones College changed from private degree-granting institutions to private junior colleges during this time period. In 1971, Jones College at Jacksonville changed back to a four-year institution while Jones College at Orlando remained a private junior college.

#### — PRIVATE BACCALAUREATE DEGREE-GRANTING INSTITUTIONS

The 5.1 per cent increase in on-campus enrollment for Florida's private baccalaureate degree-granting institutions represents an increase of 2,085 students from the fall of 1970 to the fall of 1971.

Total enrollment in this sector was 43,165 in fall, 1971. Florida residents accounted for 24,160 or 56.0 per cent of the total. In fall, 1970, Florida residents accounted for 58.9 per cent of the total. This shows an increase of

2.9 per cent in the past year in number of out-of-state students attending private baccalaureate degree-granting institutions in Florida.

Table 3 shows total non-Florida students in all Florida institutions of higher learning to be 35,259. Total enrollment of non-Florida students in private baccalaureate degree-granting institutions is 19,005 or 53.9 per cent of that total. In fall, 1970, the comparable figure was 53.2 per cent.

#### FIRST-TIME-IN-COLLEGE

An intended role of the public community and junior colleges that has shaped the development of these institutions is the enrollment of the major portion of first-time-in-college students. As evidenced by the following figures, this role is being accomplished. In the fall of 1960, 35.6 per cent of the total first-time-in-college students were enrolled in public community and junior colleges. This percentage rapidly increased until the fall of 1967, when it appeared to level off. From 1967 to 1969, the percentage of first-time-in-college students enrolled in the public community and junior colleges was nearly constant at about 65 per cent. Following a slight drop in 1970, the percentage increased to 68.8 per cent in 1971. The percentage of first-time-in-college students enrolled in the state university system and private universities declined for the same period and by 1971 had been reduced to about one-half the 1960 percentages (Table 32).

#### GRADUATE ENROLLMENT

Seven institutions in the State University System had graduate student enrollment in the fall, 1971. Graduate education was offered by nine of the private baccalaureate degree-granting institutions. The combined graduate

enrollment in the two sectors in the fall, 1971, was 19,775 students, which was 8.1 per cent of Florida's total enrollment in higher education. This represents a .5 per cent decrease since the fall, 1970, in the proportion of graduate students to undergraduate students. Prior to 1969, graduate enrollment contributed to increasing total higher education enrollment, but in the last two years the growth rate of graduate enrollment has decreased sharply.

Graduates enrolled in state universities totaled 13,630 or 68.9 per cent of the total graduates. In numbers, graduate enrollment in state universities increased by only 67 students while private university graduate enrollment increased by 313 students.

Non-Florida graduate enrollment totaled 4,313 students in the fall, 1971 --a decrease of 264 students from the fall, 1970. The public sector registered 64.4 per cent of the non-Florida students in 1971 compared with 59.7 per cent in 1970 and 63.1 per cent in 1969. The number of non-resident graduate students in private baccalaureate degree-granting institutions decreased by 309 in the fall, 1971, while the number of non-resident graduate students in the public institutions increased by 45. With the exception of the fall, 1969, non-Florida graduate enrollment in the state for the last several years showed a steady decline.

#### **NON-FLORIDA ENROLLMENT**

Non-Florida on-campus enrollment in Florida's colleges and universities was 35,259 students or 14.5 per cent of the 243,746 total enrollment. Non-resident graduate students represented 1.8 per cent and non-resident undergraduates represented 12.7 per cent of the total enrollment. The count of non-Florida students increased 3,376 or 9.6 per cent from the fall, 1970, to the fall, 1971, while total enrollment increased 17,105 or 7.5 per cent during the same period.

First-time-in-college enrollment of students from non-Florida residences accounted for 3.8 per cent (9,346 students) of the state's total enrollment. The percentage of non-resident first-time-in-college students in the fall, 1970, was 4.6.
